*Handicap can be used for players of dissimilar skill. The number given is the number of points per stroke. So, for example, if Player A has a rating of 920 and Player B has a rating of 880, and the handicap number is 10, then Player A should give 4 strokes to Player B (920-880 = 40 /10 = 4).

*SSA is the Scratch Scoring Average. That is the score that a Scratch Disc Golfer (a player with a Player Rating of 1000) would be expected to average. These SSA values assume good weather (moderate temperatures and light winds).
